R1661

Antistatic agent for 100% Cotton

R1661 is chemically processed Product. It is a special blend of Non-Ionic lubricants, Binding and Wetting agents.

The product is highly effective to form antistatic layer on fiber and the absorption of water into Fiber to increase strength, smoothness and provide good spinning actions.

Typical Chemical And Physical Properties:

- | | | |
|----|-------------------|----------------------------------|
| 1. | Appearance | Water White liquid (Transparent) |
| 2. | Specific Gravity | App. 1.02 at NTP |
| 3. | Solubility | Freely soluble in water |
| 4. | Ph of 5% solution | 8.0-9.0 |

Application:

R1661 alone applied for spinning of 100% cotton in open-end and ring frame spinning system.

Dosage:

| The recommended dosage level | |
|------------------------------|---------------|
| Type of fibre | % R1661 O.W.F |
| Grey Cotton (100%) | 0.1 to 0.15 |
| Dyed Cotton (100%) | 0.15 to 0.2 |

(0.1 refer to approx. 1 kgs in 1 ton material mixing)

It is Recommended dose but it will depend on the fibre used & atmospheric condition of the department.
