Amar Spin LV 40

Antistatic agent for PC & PV

Amar Spin LV 40 is natural oil processed Product. It is a special blend of Castrol lubricants, Antistatic, Binding and Wetting agents.

The product is highly effective to form a antistatic layer on fiber and the absorption of water into Fiber to increase strength, smoothness and provide good spinning actions.

Typical Chemical and Physical Properties:

- | | | |
|----|-------------------|----------------------------|
| 1. | Appearance | Brown liquid (Transparent) |
| 2. | Specific Gravity | App. 1.02 at NTP |
| 3. | Solubility | Freely soluble in water |
| 4. | Ph of 5% solution | 7.0-8.0 |

Application:

Amar Spin LV 40 alone or mix with binding agent (Amar Bind 2152-P) applied for spinning of Polyester/cotton, Polyester/viscose & wool in open-end and ring frame spinning system.

Dosage:

The recommended dosage level		
Type of fibre	% Amar Spin LV 40 O.W.F	% Amar Bind 2152-P O.W.F
Grey polyester / viscose blend with cotton	0.1 to 0.15	0.03 to 0.05
Dyed polyester / viscose blend with cotton	0.15 to 0.2	0.03 to 0.06

(0.1 refer to approx. 1 kgs in 1 ton material mixing)

(0.03 refer to approx. 300 grams in 1 ton material mixing)

It is Recommended dose but it will depend on the fibre used & atmospheric condition of the department.
